

Gloria Stillman is an Associate Professor of mathematics education at the Australian Catholic University (Victoria) on the Ballart campus. She is currently seconded to the Learning Sciences Institute of Australia within ACU as a researcher. Her research interests include researching the teaching, and learning mathematical modelling in secondary school and the notion of anticipatory metacognition. Since 2011 she has been the president of the International Community of Teachers of Mathematical Modelling and Applications. Many papers and book chapters she has authored focus on the teaching and assessing of mathematical modelling and applications as well as metacognition. With Prof Gabriele Kaiser, she is Co-editor of the Springer Series on *International Perspectives on the Teaching and Learning of Mathematical Modelling*. She is a member of the editorial boards of *ZDM—Mathematics Education* and *Mathematics Thinking and Learning*. Currently, she is co-editing a special double issue of *ZDM—Mathematics Education* on *Empirical research on the teaching and learning of mathematical modelling*.
